

"The learning experience here is like none other. There are such major differences in how the school allows you to work for yourself. You're not working to please the teachers."

"Because of the experience I had at New Tech, I feel comfortable getting other people to work together, collaborating to create a website or standing in front of a large group to discuss an issue."

April 24, 2012

To Whom It May Concern:

I have known Sarah Rafanan for 1 year. She is my advisory student and she is an all around great person! She is a good student, a responsible group member, and a positive influence at Sacramento New Technology High School. She enjoys learning and being a part of a community, which has been very valuable to our advisory and to her freshman class.

I would recommend Sarah for anything she pursues. Be it employment, higher education, or any other professional setting I am sure she will demonstrate a high quality of work ethic.

If you have any questions about Sarah please feel free to contact me.

Sincerely,

Senna Davis
